Government Officials

Forensic Solutions Masterclass

An intensive program designed exclusively for government officials, IAS, IPS, Judiciary, Prosecutors, CBI, ED, Vigilance Officers, and Policy Makers. This masterclass bridges the critical gap between forensic science and administrative/legal decision-making. The criminal justice system increasingly hinges on scientific evidence. But disputed documents, lab deficiencies, and the admissibility of electronic evidence are the exact reasons cases collapse. This masterclass ensures you never lose a case on technicalities.

Why is this masterclass non-negotiable?

Cases don't collapse for lack of evidence. They collapse for lack of admissible evidence, unable to prove forensic evidence, sample contamination, or expert contradiction. This masterclass is designed for the officers who sign the file, lead the probe, and defend the State.

Objectives of the masterclass

- Develop awareness of modern forensic technologies and their applications in governance and public administration.
- Strengthen evidence-based decision-making and investigative capabilities.
- Enhance the ability to identify, preserve, and utilize forensic evidence in official inquiries and investigations.
- Build capacity to address emerging challenges such as cybercrime, misinformation, document fraud, financial irregularities, and digital threats.
- Promote inter-agency collaboration between government departments, law enforcement agencies, forensic laboratories, and legal institutions.
- Introduce best practices in forensic risk assessment, intelligence gathering, and crisis management.
- Enable officials to effectively engage with forensic experts and interpret scientific findings for policy, enforcement, and judicial purposes.

By the end of the program, participants will be better equipped to leverage forensic science as a strategic tool for strengthening transparency, accountability, public trust, national security, and effective governance.

What You'll Master

- Scientific methods, evidence principles, and forensic workflows
- Mobile, computer, and cloud forensics
- Digital evidence collection and preservation
- Audio-Video Forensics
- Detection of forged documents and counterfeit records
- Handwriting and signature analysis
- Verification of official records and certificates
- Identification, collection, preservation, and chain of custody
- Best practices for maintaining evidentiary integrity
- Admissibility of forensic evidence
- Anti-corruption investigations
- Regulatory compliance and vigilance
- Public grievance, fraud, and misconduct inquiries

The mentor

Recognised as India's First and the World's Longest-Serving Forensic Journalist by World Book of Records, British Parliament, Rai brings over two decades of unmatched expertise at the crossroads of science and storytelling.

From leading newsrooms to training police forces and mentoring future forensic experts, Rai's work transforms headlines into hard evidence. Armed with double PG in Forensic Science and Criminology and Ph. D. in Forensic Science. Two certificates from United Nations Office on Drugs and Crime for anti corruption investigation and organized crime adds valuable feature in his cap. Awarded from the British Parliament and French Senate, Rai is a pioneer who doesn't just uncover the truth, he proves it.

Indrajeet Rai

Forensic Analyst and Criminologist

“ Discover how forensic intelligence helps you detect anomalies early, justify policy actions, and prove facts with verifiable data. Walk away with actionable, evidence-backed frameworks for public governance, regulatory compliance, and administrative inquiries. ”
